

\$7000 Fellowships

(Biology and Mathematics in Population Studies)

Undergraduate Research Opportunities available in the BioMaPS (Biology and Mathematics in Population Studies) program.

Eligible - Undergraduates in Biology or Mathematics interested in working with faculty on integrative projects, asking innovative questions from both biological and mathematical viewpoints

Projects include modeling of population fluctuations, polymorphisms and amphibian development; the spread of invasive plant species; and control of cancer growth.

Application forms and more information available

on-line at <http://campus.murraystate.edu/biomaps/>

by contacting Dr. Renee Fister, renee.fister@murraystate.edu,
809-2491, 6C-5 Faculty Hall

Deadline: October 9, 2009

BioMaPS is funded by the National Science Foundation (DUE # 0531865)
