11	Carboxylic acids and esters
17-21	No class – Spring Break
25	Lab test 1 AND Determining pH
Apr 1	Carbohydrates
8	Paper chromatography of amino acids
15	Separation of casein from milk
22	Lipids
29	Lab test 2; check out

We will do eleven labs; each has a report worth ten points. Your best ten lab report scores count toward your grade.

Each of the two lab tests counts 25 points. Lab test 1 covers the first five labs (through Antacid tablets), and lab test 2 covers the last six labs.

The first lab meeting is 29 Jan in Blackburn 320. You will receive details on the operation of the laboratory part of the course, including lab safety, and you will check into the lab. At this and all lab meetings, you must be properly attired: long pants, shoes that cover your feet, and safety goggles. You may obtain approved safety goggles in advance, or you may purchase them at the first meeting.
