

Colleagues,

It is that time again, preparations for ***Posters-at-the-Capitol 2006*** are in full swing and indications are that we will have a very rewarding event for those participating, as well as attending. This year ***Posters-at-the-Capitol*** will take place on February X, 200X. I encourage you to make plans to attend to support our students as they present the results of their research, scholarly, and creative work to those in Frankfort who fund higher education.

My office will send you a copy of our 200X program in January so that you may familiarize yourself with the schedule of activities and plan your day accordingly. We have over thirty participants from Murray State, with overall participation reaching nearly two hundred students from across the state. Work being exhibited by MSU students will feature a wide array of interests and areas, ranging from projects like Catherine XXX's *The Human Ecology of Islam* mentored by Dr. Chris XXX and Daniel XXX's *The Social Security Dilemma: An Analysis* mentored by Dr. Martin XXX to Lindsey XXX' *The Effect of Nutrition Intervention on Performance Measures of University Team Members* mentored by Dr. Jeffery XXX and James XXX and Melissa XXX's *Hydrogen Bonding is the Prime Determinant of Carboxyl pKA Values at N-termini of Alpha-Helices* mentored by Dr. Pablo XXX.

This year, Governor Fletcher has issued a special proclamation, calling February X Kentucky's first *Undergraduate Research Day*. Please join us to celebrate Kentucky's XXX Annual ***Posters-at-the-Capitol!***

Please let me know if your schedule will allow you to attend.

Sincerely,

John Mateja, Chair
Posters-at-the-Capitol Organizing Committee

JM/jc
